

STANDARD 401 Helm

101 Helm Upgrade

TILTING 101 Helm Upgrade

STANDARD 401 Helm

- Sleek shape to match modern console designs
- Hi-Tech composite alloy housing material enabling maximum corrosion resistance
- Smoothest and most powerful helm of its size
- Front-mount design for maximum appeal
- Improved internal efficiency
- Brass wheel nut and washer
- Anti-splash filler cap for rough conditions
- Stainless steel studs, nuts & washers pre-lifted for convenience
- Stainless steel steering wheel shaft
- Unique assembly design for ease of service and maximum performance
- Highly efficient non-return valves for non-feedback of helm unit which eliminates all torque from the steering cylinder
- Field replaceable shaft seal for ease of service

101 Helm Upgrade Options

- Compact, low profile helm with minimal protrusion from the console
- **Pump housing is marine grade aluminium, fully chromate converted, then protected by 2-pack epoxy undercoat and 2-pack polyurethane top coat. No other helm on the market matches this protection system**
- In-built lock-value elimination torque feedback
- Field replaceable shaft seal
- Solid stainless steel helm haft for optimum strength and durability
- Brass wheel nuts and washers
- 4 precision bearings for smoothest performance
- **Highest durability out of the two helms due to materials used**
- **More compact helm build for shorter steering wheel mounting**
